A SIMPLE GUIDE FOR CHOOSING

THE BEST BOOT CLOSURE SYSTEM

ELASTIC SIDED

EASY ON, EASY OFF

Elastic side panels provide all-day comfort and flexibility, making these boots quick to slip on and remove. The trade-off is a less adjustable fit and reduced support compared to lace-up or dial systems.

LACE UPS

MAXIMUM ADJUSTABILITY

Offers a customised fit and easy lace replacement, with the trade-off of slower fastening and potential snag hazards if left untied.

BOA

DIALLED-IN FIT

Secure, even fit with quick micro-adjustments that reduce pressure points and eliminates loose laces. Ideal for workers seeking comfort, convenience, and a streamlined fit. The trade-off is that replacement dial parts typically need to be arranged through the supplier.

ZIP SIDED

THE BEST OF BOTH WORLDS

Delivers the support of a lace-up boot with the everyday convenience of a side zip, making it ideal for workers who frequently remove their boots throughout the day. The trade-off is that debris can sometimes get caught in the zip, causing it to jam, and zips can be more difficult to repair than traditional laces.

HOW TO CHOOSE

Take into account the type of work you do and which features are most important to you.

Check the safety standards and requirements for your workplace or industry.

Trial and test.
